Answer Key & Explanations (with domains)

1) C — Iterative planning
 Domain: Agile Mindset
 Explanation: Iterative planning focuses on near-term detail while allowing future plans to evolve based on learning and feedback.

2) C — The circumstances that affect and explain the change
 Domain: Agile Mindset
 Explanation: Context includes the conditions and influences that shape and are shaped by the change.

3) B — Testable
 Domain: Agile Mindset
 Explanation: A requirement that can be objectively confirmed using defined criteria is considered testable.

4) C — Constraint
 Domain: Agile Mindset
 Explanation: A constraint is a fixed limitation that restricts available solution options.

5) A — Stimulate Collaboration and Continuous Improvement
 Domain: Agile Mindset
 Explanation: Retrospectives promote shared learning, collaboration, and continuous improvement.

6) B — Developing highly complex analysis models with no direct use
 Domain: Agile Mindset
 Explanation: Creating artifacts that are not used to deliver value represents waste.

7) D — The act of transformation in response to a need
 Domain: Agile Mindset
 Explanation: Change represents the transformation undertaken to address an identified need.

8) A — Following a plan
 Domain: Agile Mindset
 Explanation: The Agile Manifesto values responding to change over strictly following a plan.

9) D — Stimulate Collaboration and Continuous Improvement
 Domain: Agile Mindset
 Explanation: Solutions evolve through collaboration, learning, and continuous improvement.

10) A — To guide delivery and continuously deliver value
 Domain: Agile Mindset
 Explanation: Stakeholder feedback is used to steer decisions and maximize value delivery.
